

# AFTERCARE INSTRUCTIONS

LONESOME PALM TATTOO  
& TRADING COMPANY

4451 MILDRED BASS RD  
SAINT CLOUD, FL 34772  
407-572-7775

- 
- 1. If a regular bandage is applied: After 2 hours, remove the bandage.  
Do not leave the bandage on for more than 4 hours. Hand wash with lukewarm water and mild soap.  
Do not rebandage. Let your tattoo air dry, and then apply a thin film of A&D Ointment or Tatjoy Tattoo Balm three times a day for the next 24-48 hours.**
- 2. If Derm Shield, SaniDerm, or any other Adhesive Tattoo Film has been applied: We recommend that this be kept on for 24 hours, with a maximum of three days.  
Do not wear any piece longer than one week. If skin irritation occurs, bubbles of fluid build under the film, or any amount of bodily fluids leak from film, the bandage should be removed immediately.  
We recommend removing this while in the shower, slowly pulling an edge back over itself. Wash with a mild antibacterial soap, air dry, and apply a thin film of balm.  
Follow the instructions below after the Adhesive Film Is removed.**
- 3. After 24 – 48 hours, Wash and use Cocoa Butter or Tatjoy Tattoo Balm until skin returns to its pre-tattoo condition.**
- 4. Stay out of sunlight and tanning booths until the tattoo is healed, at least 14 days.**
- 5. Do not soak your new tattoo in a tub, sauna, Jacuzzi, or go swimming while your new tattoo is healing.  
Showers are fine.**
- 6. Do not rub or pick the treated area while it is healing. Loss of color and/or infection could occur.**
- 7. Extreme sun and exposure over the years can and will fade your tattoo. This can be minimized by using a strong sunscreen, at least SPF 25.**
- 8. Your tattoo should heal in approximately 2 weeks.  
Consult a physician if any signs or symptoms develop, such as the following:  
redness at the site, green/yellow discharge (foul-smelling), and/or fever.**
- 9. Should you have any problems or questions, call us at:**
